Topic D: Digital Transformation

MSE 2

24 - 26 Sep 2024 (Darmstadt) dgm.de

D01: Navigating the Digital Revolution in Material Science and Engineering - General Symposium Topic D

Dive deep into the transformative influence of digitalization in Material Science and Engineering. This symposium, designed as a beacon for innovators and thinkers, will delve into every nuance of digitalization's impact, from pioneering predictive simulations to avant-garde materials design techniques. Together, we will look at case studies, share research, and forecast the future where nearly three-quarters of material-based innovations will be born out of digital advancements. Whether you're a researcher, industrialist, or academic, this symposium promises a comprehensive look at a digitally-empowered future in materials science.

Symposium Organizer

Prof. Dr. Chris Eberl Fraunhofer Institute for Mechanics of Mater...

Dr. rer. nat. Tilmann Hickel Max-Planck-Institut für Eisenforschung GmbH
