Topic F: Functional Materials, Surfaces and Devices

F01: Future Frontiers - Innovations in Functional Materials & Devices - General Symposium Topic F

As the world accelerates into a technologically advanced future, functional materials, surfaces, and devices stand at the helm of this change. This symposium serves as a melting pot for ideas, innovations, and challenges in this domain. From exploring the potential of nano and microstructured materials across sectors like energy and transportation to diving deep into the intricacies of shape memory alloys and multiferroic materials, we promise an all-encompassing experience. Join us as we embark on this journey, unearthing the next big breakthrough in functional materials.

Symposium Organizer

Prof. Dr. Antonio Ancona
University West

Prof. Dr. Carsten Gachot
TU Wien

Prof. Dr.-Ing. Andrés Fabián Lasagni
TU Dresden
